Hurricane Assignment

MA132 College Mathematics

1. List the topics covered in class
2. List and define the new mathematical terms
3. Give an example of each type of problem and/or exercise covered in the last meeting.
4. List the topics covered in the next assignment on the time line.
5. Write the definitions of the new terms involved in this assignment.
6. Do the homework problems from the time line (including Lab)

Note:

- If we are out for an extended period of time do 2 assignments per week using the format above. It is expected that the student completes the work before we return to class.

Additional lectures, tutorials, assignments and/or assessments may be given or required
