MA 134 Hurricane Assignment

1. List the topics covered in the class.
2. List and define the new mathematical terms.
3. Give an example of each type of problem and/or exercise covered in the last meeting.
4. List the topics covered in the next assignment on the time line.
5. Write the definitions of the new terms encountered in this assignment.
6. List an example of each type of problem and/or exercise in this assignment.
7. Do the homework problems from the time line.

Note: If we are out for an extended period of time, do two assignments per week using the format above. It is expected that the student completes the work before we return to class.
